

tado°

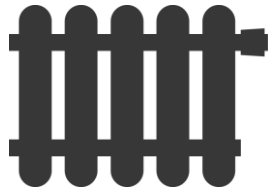

tado° is the most intuitive heating and cooling management service

35 % of the world's energy consumption for heating and cooling of buildings

74 % of all buildings in Germany are built before 1979 and are poorly insulated

77 % of heating systems are inefficient & 85% of the people do not turn down their heating when leaving the house

The first Geolocation App for your heating

- 1 Detects where you are
- 2 Sets the temperature accordingly
- 3 Saves energy 🌿

tado° works for you around the clock

Adapting to your apartment

tado° learns quickly how to reach the temperature in your house most efficiently.

Adapting to the weather

tado° adapts to the weather forecast. When the sun is shining, tado° will heat less and save energy.

The mobile assistant that accompanies you wherever you are

An assistant that controls your heating at home

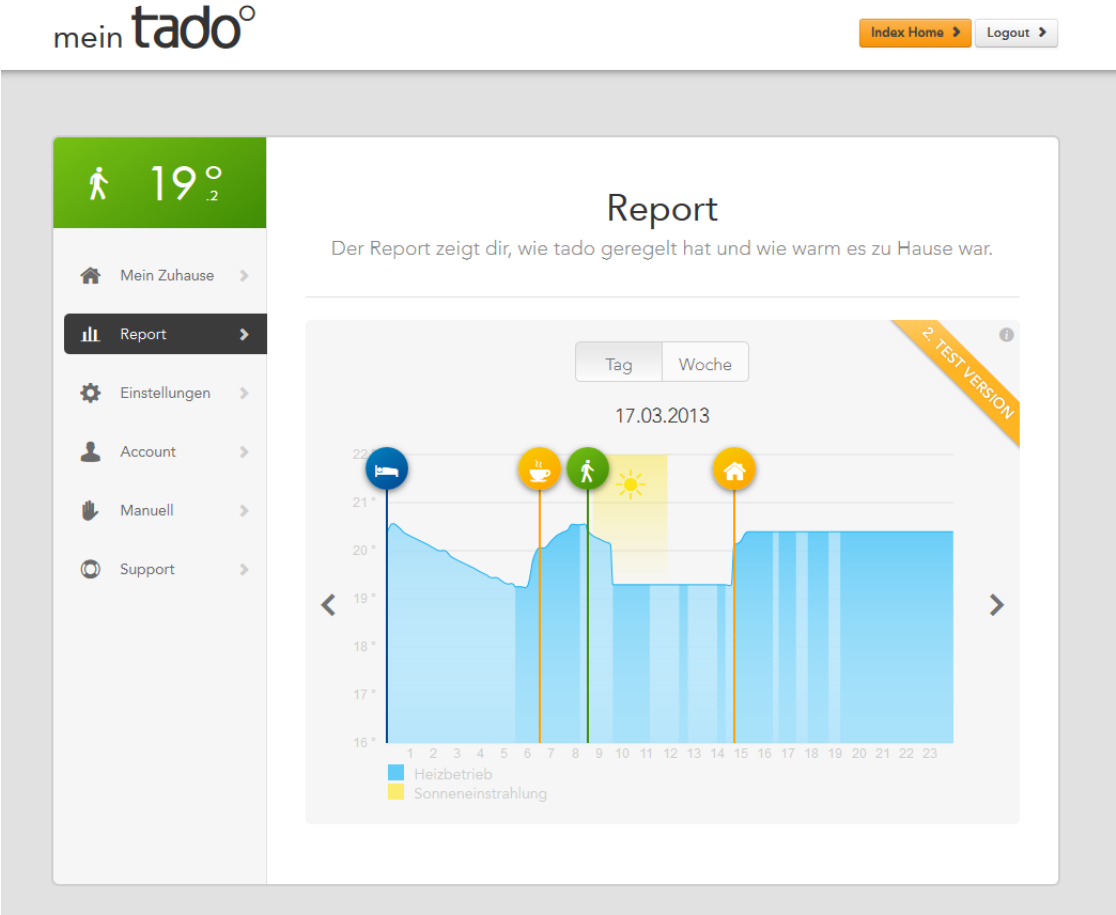

See what is going on.
Reports and energy consumption in real-time

Have a remote control in your pocket

Delivering an unprecedented level of transparency

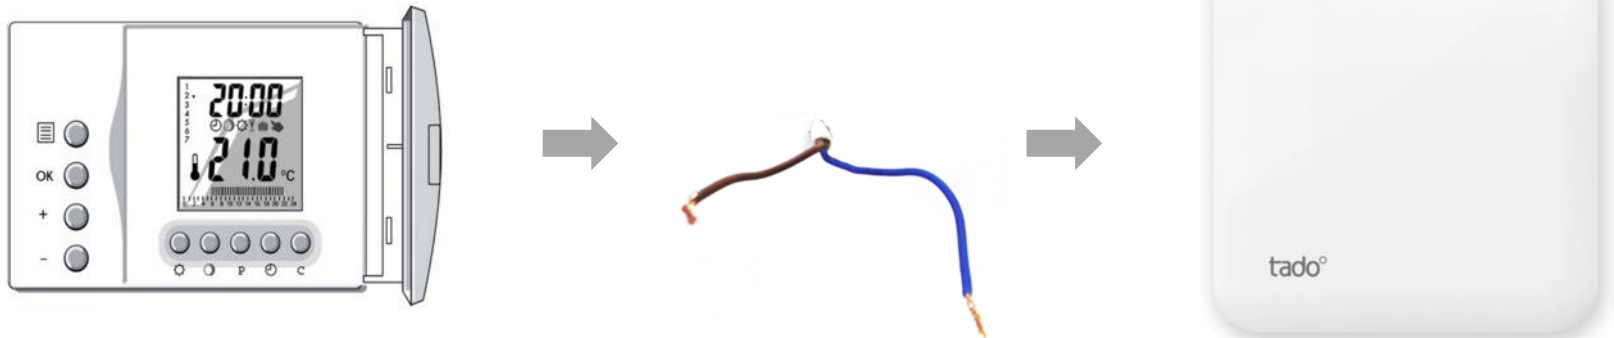

...and the good feeling to live responsibly

To connect your heating system to the cloud ...

... simply replace your old thermostat

97% of customers install tado themselves & need only 15-20 min

tado° also offers an optional installation service

„The installation was foolproof with a terrific web assistant! I am totally excited and will recommend tado° without limitation!“

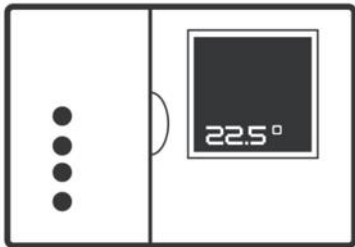

-Mr. Deters, via twitter

*„It just took me 10 minutes to install tado°!
Great product, unbelievable user-friendly!“*

-Mr. Reichert, tado° via twitter

Individual thermostats vs. interconnected device cloud

Breaking with the concept of traditional thermostats ...

... introducing a completely new approach based on IoT-technology.
