

easy. electric.

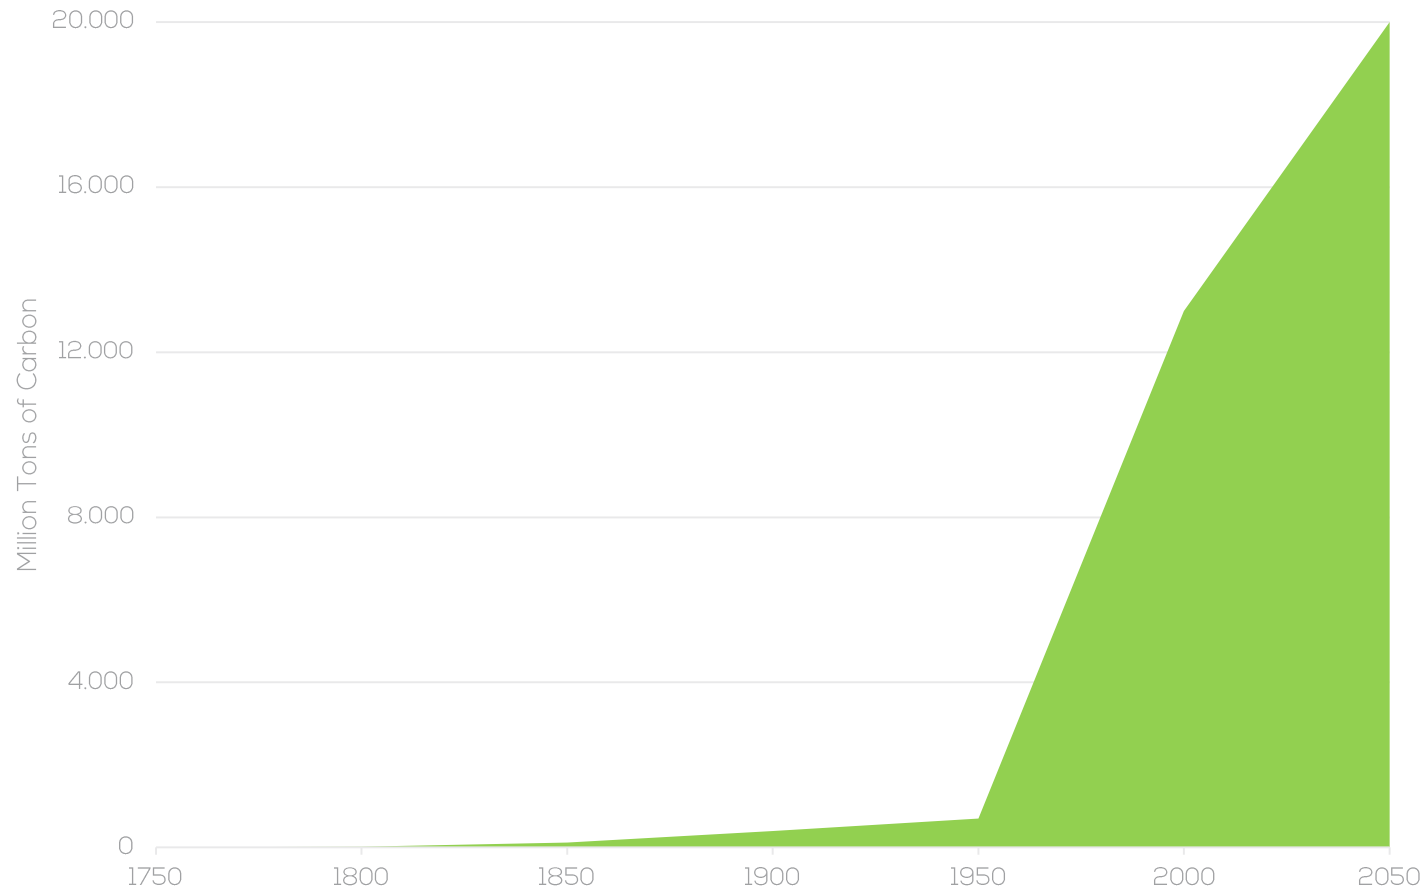

eeMobility @ Ecosummit

Berlin

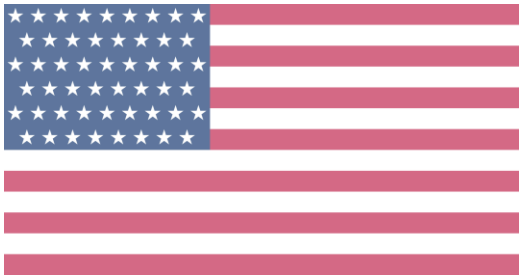

Smart flat-rate EV charging
at home and everywhere

Record High CO₂

Deaths attributable to transport emissions per year

→ 53,000

→ 7,000

New factors are pushing to a change of mindset

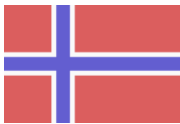

Source: Daily Telegraph Online; Photo: AP/Richard Drew

New policies emerging

→ Target for 1 million electric vehicles by 2020

→ all new cars to be fully electric by 2025

→ all new cars to be fully electric by 2020

→ only electric vehicles by 2030

Disruptive change!?

Source: Inhabitat.com

eeMobility offers full-service charging solutions for electric vehicles

Smart Charging

Example:

1 million cars

→ 4,000 kWh per year

→ 4 TWh electricity

→ 11 GW installed capacity

→ 800 million Euros revenues in charging

→ 80 million Euros optimization potential
