Next Generation Carsharing

The problems of our clients

Car Owner

Repair costs

Petrol costs

**Depreciation and
Maintenance**

Paperwork

People without car

Bad weather

Carrying groceries

Heavy luggage

Little time

Our solution: The ZappKit

KEYLESS OPENING

The ZappKit is a novel car manufacturer independent hardware solution, which enables car owners to share their vehicles with other people. Therefore renters can open cars with their smartphones. A key exchange is not necessary.

THE ADVANTAGES

- **Keyless handover**
- **Innovative immobilizer**
- **Easy to use**
- **Quick installation**
- **Comfortable car sharing**
