

The contribution of a tech institute in clean tech value creation

Markus Leuenberger
Director Business Development

ECO13; Berlin, 4-5 June 2013

An ivory tower?

- Working quietly on abstract solutions
- Noble but impractical
- Elitist and private knowledge, inaccessible

Anno 1500, 'Hunt of the Unicorn Annunciation',
From a Dutch Book of Hours

ECN's mark: a globally renowned tech institute for renewable energy

- Solar
- Wind
- Biobased
- Energy efficiency
- Policy advisory
- Environment & Energy Engineering
- 550 FTE
- Global scope
- Strong networks (industry/govt's)
- Multidisciplinary experience
- Own scale-up experience
- Integrated offering

Engaging with investors/entrepreneurs

- Wind is changing rapidly
- Mandate to help bring new technology to market
- Ventures are creating much needed market dynamics
- Learning and offering more potential spin off

Capabilities

- In depth tech expertise
- Networks
- Multidisciplinary experience

Organizing proces

- Approachable
- Early sounding
- Link to investment thesis
- Trust & dialogue

Engagements

- Technology due diligence
- A-team problem solving / second opinion
- Policy impact scan

De-risking clean tech

Professional investors have a robust process to assess investment opportunities, and to select a number of potential winners in the clean tech landscape. While investment managers have the skill set to analyze a broad array of ventures in the clean tech field, a more in-depth perspective on the quality of the technology of a venture is often required. The renowned global clean tech institute ECN, in co-operation with venture capital advisor Road to Value, now offers investors concise technology due diligence in a select number of areas in clean tech.

About us

ECN develops renewable energy technology with and for the market, contributing to a future sustainable energy system. ECN plays a leading role in R&D and has gained a strong reputation worldwide. 550 employees passionately work on renewable energy at ECN every day. With our state-of-the-art knowledge and expertise, we offer clean tech investors high-level due diligence services.

Venture capital advisor Road to Value has in-depth expertise in the venture development process, lowering the threshold to bringing ECN's services and the specific investor needs together.
